

# THE HENRY'S DIFFERENCE PIZZERIA QUALITY, THAT'S FROZEN

## *The Henry's Difference Pizzeria Quality - But Frozen!*

- We started with a thinner crust which is preferred by 70% of consumers
- We added a “pencil” edge to the crust to reduce ingredient “spillage” in the ovens
- #1 complaint from bar owners is having to clean the ovens
- We layer the pizzas with a lightly seasoned red sauce made from a fresh pack puree. This sauce delivers significantly better flavor, color, aroma and mouth feel. Remember – 60% of your pizza's flavor comes from the sauce.\*
- We shred fresh mozzarella on-line to improve flavor and appearance
- All the mozzarella is from milk certified both as steroid and added growth hormone free
- Utilize only the best toppings such as Burke Sausage, flash frozen veggies
- All your favorite varieties are in 6 pack cases for convenience in inventory and pricing
- Full support materials: menu boards, promotions...
- All on the Henry's weekly order; reducing cost from an additional invoice (\$70+) and improving cash flow due to lower inventory from weekly delivery

*\*most pizza manufacturers purchase their sauce in bulk which has been cooked (by the sauce manufacturer) who adds chemicals like citric acid for shelf life. These sauces then have to be remixed with sugars and other spices to attempt to get close to the original sweetness and flavor. This process produces a sauce with a more “chemical” flavor, washed out or orange color and a sauce that breaks down and separates when cooked... not fresh and flavorful!*

# THE HENRY'S 12" LINE UP
